Color wheels for printing and or mixing colors (e.g., oil painting), are not the same, so our focus is simply on what looks good to us, not the pigment mixing of paints, for painters and printers. If you look at the traditional color wheel, the complementary colors are the ones opposite of each other.

Add Contrast to Your Images by Using Complementary Colors

high, covering samples from the whole color wheel, or low, covering about one-third of the color wheel. One row was pre-cued (attracting focal attention), an array was briefly presented, and the subject had to first report a letter (indicated by a box) from the previously cued row and then decide between high and low color diversity in either the
