Web-Based Hardware Page

Firmware is the software that runs all the basic operations on your EV3 Brick. Your programs and the firmware work together to make the EV3 Brick do all things you want it to. Your EV3 Brick comes with firmware pre-installed, but it may need to be updated to work properly with MakeCode. To check the the firmware version on your EV3 Brick:

Troubleshooting - Microsoft MakeCode

MakeCode for EV3 is a browser-based programming environment that enables students to program a physical robot or a simulated EV3 brick.The simulator enables to students to test and debug their programs interactively. They can precisely control sensor input values and get immediate feedback about what's happening with the motors and the display.

Virtual Robots, Brick Emulators, and Simulated ...

Data logging: The EV3 data logging software can be used to log sensors with the NXT. However, the graphical programming function, which allows you to program the motors using trigger values from the sensors, does not work with the NXT. Robot Square has a nice comparison of the EV3 and NXT, including a discussion of compatibility.

Using EV3 software to run the NXT - LEGO Engineering

Use this app to build and program your EV3 robots in the fastest, smartest and most fun way possible - directly from your tablet without the need for any wires or additional software. EV3...
