To make a drone, you'll need some model wood, metal, or plastic for the frame, as well as the electrical components, which include motors, propellers, speed controllers, a flight controller, and a power distribution board. Once you have your supplies, make an "X" shaped frame with your model material and use glue or duct tape to secure it.

VM Motori S.p.A. is an Italian diesel engine manufacturing company which is wholly owned by Fiat Chrysler Automobiles through its subsidiary Fiat Group Automobiles. VM headquarters and main production facilities are located in Cento, in Emilia-Romagna, Italy.

VM Motori - Wikipedia

Step 1, Cut an aluminum can to about 2 1/2 in (6.4 cm) tall. Use tin snips or shop scissors to make a smooth horizontal cut about 1/3 of the way up from its base and around the can's circumference. Step 2, Fold and crimp the cut rim with pliers. Fold the rim on each piece of the can in on itself to eliminate its sharp edges. Take care not to cut yourself as you do so. Step 3, Push the bottom of the can out from the inside to flatten it. Most soda cans have a circular base that ...

Build a Simple Motor with Household Materials | Make:

The motor is installed in place of the original combustion engine, normally with an adaptor plate custom-made by an engineer to connect the motor to the transmission. It's quite a simple system, but has to be installed by someone who knows what they are doing. 5. Register your EV. You will need to ...

EV Conversion Guide - Electric Vehicle Motors

Four-cylinder engines commonly come in "straight" or "inline" configurations while 6-cylinder engines are usually configured in the more compact "V" shape, and thus are referred to as V6 engines. V6 engines were the engine of choice for American automakers because they're powerful and quiet, but turbocharging technologies have made four-cylinder engines more powerful and attractive to buyers.

Hyundai Motor to buy robot maker Boston Dynamics from SoftBank

Engine Block (Cylinder Block) The engine block is the foundation of an engine. Most engine blocks are cast from an aluminum alloy, but iron is still used by some manufacturers. The engine block is also referred to as the cylinder block because of the big hole or tubes called cylinders that are cast into the integrated structure.
