Two Billion Cars Driving Toward

Two Billion Cars is a very informative book on transportation and sustainability issues. The premise of the book is that currently we have one billion cars, but in twenty years, the planet will have about two billion cars. If there are no changes, this growth in cars will be disastrous in terms of energy usage, congestion, and global warming.

Today there are over a billion vehicles in the world, and within twenty years, the number will double, largely a consequence of China's and India's explosive growth. Given that greenhouse gases are already creating havoc with our climate and that violent conflict in unstable oil-rich nations is on the rise, will matters only get worse?
